Wireless Configuration Guide:

Droid Ice Cream 4.0

The Johns Hopkins University has expanded its wireless service and now offers a new network “hopkins”. The “hopkins” wireless network uses strong 256 bit Advanced Encryption Standard (AES), and Microsoft Internet Authentication Service (IAS) for authentication to provide a higher level of security and access.

Access to the Johns Hopkins wireless network will require a one-time registration into the Johns Hopkins Address Registration System (JHARS). Registration on the Johns Hopkins Registration System can only be done using your account entry from the Johns Hopkins Enterprise Directory (JHED). Your account entry will require your JHED login ID (LID) and password.
