Wireless Configuration Guide:

Droid Ice Cream 4.0

The Johns Hopkins Institutions offer the hopkins wireless network to faculty, staff, students, or anyone with a valid JHED ID. The hopkins wireless network utilizes WiFi Protected Access (WPA2) with 256-bit Advanced Encryption Standard (AES), to provide a high level of security and access.

Access to the Johns Hopkins wireless network will require a one-time registration into the Johns Hopkins Address Registration System (JHARS). Registration on the Johns Hopkins Registration System can only be done using your account entry from the Johns Hopkins Enterprise Directory (JHED). Your account entry will require your JHED login ID (LID) and password.

How do I find out my JHED account information?

Step 1
You will need access to a wired (ethernet) connection: your system in your dorm room, the computer lab in Krieger Hall Room 160, or the library.

Step 2
Open a web browser and go to http://my.johnshopkins.edu

Step 3
Click the First Time JHED User link.

Step 4
Follow the instructions on the login page to find out your Login ID and to set your password.
Step 5: From the menu, select the **Settings** Icon:
Step 6: Select Wi-Fi
Step 7: Select Add Network
Wireless @Johns Hopkins

**Step 8:** Enter **hopkins** Network SSID
Wireless @Johns Hopkins

**Step 9:** Drop Down Triangle Select:

- **Security** 802.1x EAP, **EAP Method** PEAP, **Phase 2 Authentication** MSCHAPv2
Wireless @Johns Hopkins

**Step 10:** Enter userid/password under JHED **Identity** and **Password** then **Save.**
Step 11: The Hopkins network should show as connected.
Step 12: Click into the connected network and Status Information will display.
Where do I get additional help?

**Technical Assistance (walk-up)**
Garland Hall Basement
Monday – Friday 8:00 AM – 4:30 PM

**Contact the Support Center at:**
(410)955-HELP (410)955-4357 Johns Hopkins East Baltimore
(410)516-HELP (410)516-4357 Johns Hopkins Homewood Campus
(443)997-HELP (443)997-4357 Johns Hopkins Mount Washington Campus
